1.0 Purpose of the Management Plan	
2.0 Site Description and History	
3.0 Literature and Related Reports and Studies	6
4.0 Administration	
5.0 Detailed Planning for Infrastructure Upgrades	21
Attachment 1 – Management Order and Certificate of Title	24
	24
Attachment 2 – Photographs of Shacks	27
Attachment 3 – Examples of Potential New Shack Designs	
Attachment 4 – Letter from Department of Mines	

This is the second Management Plan that has been prepared specifically for Reserve 24308, incorporating the use by the lessees of the Naval Base Shacks. The City facilitates two key elements of the Reserve, 1.Administration of the site and 2. Future management approaches.

The Management Plan has been prepared by the City of Cockburn, as the Management Authority, to guide and assist in the future management of the Reserve. It also outlines strategies for how future improvements to the Reserve will take place.

In preparing this Management Plan the City has given due consideration to the recommendations/findings made by the Standing Committee on Environment and Public Affairs.

# 2.0 Site Description and History

# 2.1 History of Reserve 24308

Anecdotal records from the City indicate that parts of the area, now represented by Reserves 24308 & 24309 were used as an informal camping ground as early as 1933. Historically, Reserves 24308 & 24309 were created and set aside for the purpose of public utility in 1955, following the transfer of the land from the Commonwealth.

The original vesting of Reserves 24308 & 24309 to the Cockburn Roads Board was approved by the Executive Council and granted on 10 July 1957 for the purposes of recreation and camping. The Vesting Order for Reserve 24309 contained the power to lease. The Executive Council also designated Reserves 24308 & 24309 as 'A Class' Reserves at the same time.

Original structures placed on the land consisted of caravans with annexes. Over time the structures have become more permanent in nature and no longer represent a caravan with a soft or rigid annex.

The site was originally managed as a Caravan Park, with a register of City of Cockburn residents being allocated a site each time a lessee surrendered their lease. It has now evolved into exclusive holiday accommodation with the sites and structures being sold on the open market. In April 2024 the City recorded under 20% of shack owners to be City of Cockburn rate payers out of the 170 lessees.

# 2.2 Current Tenure of the Land

Part 4 of the Land Administration Act 1997 provides the legislative basis for the creation, management, amendment, and cancellation of Reserves of Crown Land. A Reserve represents Crown Land which has been set aside or dedicated for a particular purpose in the public interest. There are hundreds of Reserve purposes utilised across the State, recognising the diverse role and function which Reserves must perform in the public interest. The purpose of Reserve 24308 is 'Recreation and Camping'.

In terms of management, once a Reserve is created it is placed under the care, control and management of a State Government department, Local Government, or incorporated community group. This is processed by way of a Management Order registered against the relevant parcel of Crown Land and is endorsed on the Certificate of Land Tenure. In terms of Reserve 24308, a Management Order exists with the City of Cockburn which includes the power to lease for up to 21 years. The Management Order does limit use to being consistent with the Reserve purpose ('Recreation and Camping'), with all leases subject to the Minister for Lands approval.

In addition to the Reserve purpose and Management Order requirements, Reserve 24308 is classified as an 'A Class' Reserve which affords the greatest degree of protection under the Land Administration Act 1997. In terms of historical appreciation, the Land Act 1933 provided for Reserves of Crown Land to be classified as Class A, B or C Reserves. This approach was extinguished under the Land Administration Act 1997, with a new approach in the form of classifying all Reserves as one and the same but keeping the notion of 'A Class' Reserves. 'A Class Reserves continue to be classified separately, representing the greatest level of importance and need for high level protection. Any proposal to undertake a major amendment to an 'A Class' Reserve, including modifying the Reserve purpose, can only take place by tabling the proposal in both Houses of Parliament in accordance with section 43 of the Land Administration Act 1997.

In December 2022, Reserve 24308 was entered into the State Register of Heritage Places pursuant to section 42 of the Heritage Act 2018, noted as P17868 Peel Town Archaeological Site, Henderson. While this Registry entry does note that "the Naval Base…does not contribute to the cultural heritage significance of the *Peel Town Archaeological Sites*" the Reserve makes up some of the 43.5 hectares of coastal vegetation containing archaeological sites dating to the 1829-30 occupation by Thomas Peel's settlement group.

On 29 April 1999 the then Minister for Lands (Hon Doug Shave MLA) advised the City that the "leases are only an interim measure, which the State has accepted, to recognise the existence of the shacks until such a time as the situation is rectified." In further correspondence dated 26 April 2001, it was stated that the then Department of Land Administration "would prefer a policy that allowed for the replacement of existing structures, rather than one that encouraged expansion or major development. This would ensure that Lessees were under no misapprehension that their tenure is both short term and finite."

During extensive negotiations with the State Government, consideration of wide-ranging options by the Council of the City of Cockburn and wide-ranging dialogue with Lessees, the City secured support from the State Government for the use of the Reserve for the Shacks to continue. This is consistent with the Reserve purpose, and the power to lease which formalises the leasing arrangements of the site.

The City of Cockburn subsequently entered into a lease arrangement with the Lessees for a 5-year period with a further option to renew for 5 years, spanning the years 2012-2022. The City is now seeking to enter a second lease arrangement for the same period of time, subject to the consent of the Minister for Lands.

#### 2.3 The Site

Reserve 24308 is a 'Class A' Reserve and is Crown Land by virtue of Crown Land Title LR3107-425. The City of Cockburn has a Management Order for the Reserve for the purposes of 'Recreation and Camping'. The land is located at 1136 (Lot 373) Cockburn Road, Henderson and consists of an area of 4.5468ha. The land currently has 170 'shacks' located on it, with a variety of forms and design. Attachment 2 contains photographs of examples of the Shacks and Attachment 3 examples of potential designs for future shacks.

The site has a sound internal road system that permits the safe traffic of vehicles at a restricted speed, with adequately installed speed reduction devices (speed humps). The speed limit is not enforceable at any legislative level and the internal road system is not classified as a public road, exempting the application of the Road Traffic Act and associated regulations.

The Reserve contains two ablution facilities, which were constructed by the City for use by shack owners and Reserve patrons. The ablutions have mains electricity and a potable water supply. Figure 1 details the layout of the Shacks on the Reserve at this time.

A potable water supply for shack owners is provided through the strategic location of water taps within the Reserve, with connection via hose. The shacks do not have access to other core utilities, such as mains electricity, reticulated gas or sewer.

Most shacks have been fitted with bottled gas and generate their own electricity supply through solar panels, small wind turbines and power inverters. There is little uniformity around arrangements.

Figure 1 – Reserve 24308

## 2.4 Reserve 24308 - Management Order

The original Vesting Order for Reserve 24308 was issued to the Cockburn Road Board in 1957. When the Reserve was created by the Executive Council, it was designated as an 'A Class' Reserve. The Vesting Order was then transferred into the name of the City of Cockburn in 1960 when the Local Government Act 1960 was enacted. In 1997 when the Land Administration Act 1997 was proclaimed, Vesting Orders were renamed Management Orders.

The Management Order in Attachment 1 has the power to lease for 21 years.

# 2.5 Administering Legislation

The City has investigated the legislation that is applicable to the land and the type of improvements thereon, in order to underpin the structure of leasing arrangements as well as to inform the preparation and subsequent review of this Management Plan. A brief explanation of the results of this investigation is provided below:

## Caravan and Camping Grounds Act 1995

The structures on the land do not represent the type of accommodation envisaged by the Caravan and Camping Grounds Act 1995, as the relevant accommodation must be capable of being attached to a vehicle (vehicle being a caravan). Naval Base shacks do not fit these criteria.

## Residential Parks (Long Stay Tenants) Act 2006

This Act defines the meaning of a 'long stay tenancy agreement' which relates back to residential parks, the definition of which refers to Caravan Parks. The land cannot be considered to constitute a caravan park, ruling out the application of this Act.

## Residential Tenancies Act 1987

The Residential Tenancies Act 1997 (RTA) only applies to 'residential tenancy agreements'. The Management Order requires that tenants are only allowed to 'camp' in the structures, and are not permitted to live in them on a permanent basis, therefore the RTA does not apply.

## Property Law Act 1969 & Common Law

The Property Law Act 1969 applies to all 'leases' but the application is subject to whether any other relevant legislation applies, which there is none. The term 'lease' is defined in broad terms to include any 'tenancy'. Therefore, the land is subject to the provisions of the Property Law Act 1969.

The Property Law Act 1969 has provided the framework in which to structure the new lease agreements for the land, which began formal operation in 2012.

# Planning & Development Act 2005; Health Act 1911 & Building Act 2011

Use and development of the Land, and specifically the control of use and development of the land, is representative of the relationship between the Planning and Development Act 2005, Health Act 1911 and the Building Act 2011. These commonly come into use through the consideration of applications for planning approval, building permit applications and inspections undertaken from an environmental health perspective.

# 3.0 Literature and Related Reports and Studies

# 3.1 Environment and Public Affairs Committee Inquiry into Shack Sites in Western Australia

The City considered the recommendations made by the Environmental and Public Affairs Committee's Inquiry into Shack Sites in Western Australia. The Committee finalised their report in April 2011.Below is an extract relevant to the Naval Base Shacks featuring three specific findings of the Committee (findings 49 to 51) with no specific recommendations given.

The City was largely acknowledged for trying to further formalise the use of the site, particularly by way of improved leasing arrangements and controls around land use and development. In reflection of this, the preparation of a Management Plan for the site was a key finding made by the Committee.

The Committee noted the collaborative process which the City was working through in determining an appropriate shack standard and a new management approach. The Committee suggested the logical next step into a new management plan for the site would provide the further formalisation of activities undertaken on the site. This underpins the collective efforts the City has gone to in managing the site to an improved and sustainable standard.

The following extracts from the Committee Report of note are below:

10.44 A distinguishing difference between this site and other shack sites is that Naval Base is the only shack site located within metropolitan Perth. Also, unlike a number of other sites, the shacks are arranged in a reasonably ordered manner (compared to the ad hoc nature of other sites) on a heavily bituminised area."

10.45 The Committee note that the leasehold tenure at this site differs from sites such as Peaceful Bay and Dampier Archipelago. Although the City has renewed the shack leases annually, there is no obligation to do so and, under the terms of the lease, the lease may be cancelled within 14 days' notice. The Naval Base lease does not set the building and health standards or provide for an increase in standards. Unlike other shack sites, the City has not established any management plan or strategy for the site. The Council provides basic facilities at the site.

10.47 The Committee accepts that there is social heritage at Naval Base, formed by people and families sharing the experience of staying at this site and enjoying the experiences this site offers.

10.49 If shacks are to remain, the City of Cockburn should develop a management plan which may incorporate short term holiday accommodation as an option for the public.

Finding 49: The Committee finds that the City of Cockburn manages 178 shacks at Naval Base. This Reserve was vested in the City of Cockburn decades prior to the Squatter Policy. The shacks are leased for a period of one year. To date, the City of Cockburn has offered a lease each year.

Finding 50: The Committee finds that the City of Cockburn is currently undertaking a public consultation process to consider the future of Naval Base, including whether to remove the shacks and bring the vested Reserve under the Caravan Parks and Camping Grounds Act 1995. The Council will consider the results of the public consultation and deliberate on this issue in due course.

Finding 51: The Committee finds that the City of Cockburn should continue to manage the process, including community consultation, they are presently undertaking to determine the future of Naval Base.

## 3.2 Bush Forever Status

Reserve 24308 is identified as Bush Forever site (Site No. 346) failing within the greater Lake Mt Brown, Brownman Swamp and Henderson Regional Open Space areas.

It is noted that the subject area has been cleared and essentially very little native vegetation currently exists. Accordingly, management of the site recognises that the Bush Forever status of its surrounding context, as opposed to specific bush attributes on the site itself.

# 3.3 State Squatter Policy

In 2005 the Department of Regional Development and Lands developed a policy on the Illegal Occupation of Coastal Crown Land (Squatters). The objective of which was to control the establishment of any new unlawful dwellings (squatter shacks) on Coastal Crown Land and facilitate the removal of existing dwellings (Shacks) over a six-year period. The policy was developed based on an earlier State Government Policy on squatters adopted by Cabinet in July 1989 and January 1990.

The Policy does not apply to the site, based on the formalisation of controls and legislative framework to which the site has progressively been brought under. Most notably, the existence of a Management Order with power to lease, differentiates this site from the examples that the State Squatter Policy has been targeting in terms of Unallocated Crown Land.

The purpose of this study was to examine the cumulative risks associated with new and proposed developments in the Kwinana Industrial Area (KIA) that change the risk profile of the area.

A Steering Committee was established in 2005 by the Department of Industry and Resources (DOIR) with representation from the Kwinana Industries Council (KIC) and relevant government agencies, to update the Kwinana Cumulative Risk Study (KCRS).

The Steering Committee's objectives were to:

- 1. cConduct a review of current best practice in Land Use Safety Planning (LUSP), methodologies and how they may be applied to the KIA, to ensure that the approach taken was in line with current national and international practices;
- Develop an up-to-date cumulative risk model for the KIA, taking into account the changes in industry and surrounding land uses, improvements in Quantitative Risk Assessment (QRA) modelling and data sources;
- Develop an up-to-date cumulative individual risk contours (and societal risk data) for existence and predicted developments in the KIA to provide a framework for ongoing industrial developments and LUSP decisions making in the area;
- 4. Assess the development risk data against current WA risk criteria;
- 5. Provide relevant training to industry and government agencies in the ongoing use and maintenance of the Kwinana Cumulative Risk Assessment model.

The key findings of the report were -

- (i) the current (2017) individual and societal risks to the surrounding community are consistent with the established criteria and do not pose such a significant risk as to require immediate changes to land uses in the area; and
- (ii) the future case (2030) indicates that the risks associated with the proposed expansion to the KIA are not inappropriate provided key land use conflicts (i.e. residential populations in the Hope Valley areas) are addressed before any expansion of the KIA into these areas.'

There is concern that the KCRS Steering Committee may not have been fully aware of the shacks, their frequency of use, and possibly may have underestimated the potential risk to users of Reserve 24308. To evaluate the potential risk, and analysis of the risk contour maps developed as part of the study need to be examined more thoroughly. These maps express the "Total Cumulative Individual Risk Results in a visual form for both 2007 and future risk in 2030.

The 2007 risk contour map, Figure 2, shows that there was some, but limited, potential for individual and societal risk due to the close proximity of the transport corridor (Cockburn Road) to the Reserve and the types of materials transported. From the small risk contour near Reserve 24308, it is evident that there is a small amount of dangerous goods transported on Cockburn Road.

The future case (2030) risk contour map, Figure 3, in the context of Reserve 24308, shows a significant expansion of the risk profile, predominantly from the proposed outer harbour development, due to a projected increase in the transportation of dangerous goods/product in the area.

## Figure 2 -2007 Risk Contour Map

Figure 3 - Future Case Risk Contour Map

#### Key

1×10.<sub>6</sub> p.a. – Active Open Space Criteria (Recreational facilities) 5×10.<sub>6</sub> p.a. – Commercial Development Criteria
1×10.<sub>6</sub> p.a – Residential Population Criteria
5×10.<sub>7</sub> p.a – Sensitive Population Criteria (Aged Care or schools etc).

While there is no immediate impact from a risk management perspective on Reserve 24308 under the 2007 modelling, the future risk modelling does raise questions as to the level of potential risk for users of Reserve 24308 for the next 10 years if industrial development continues according to the projections.

To address this, the City wrote to the responsible State Government Departments requesting clarification as to the protection mechanisms that would be afforded to the site while it remained utilised by shacks. In response, confirmation was received from the Department of Mines and Petroleum regarding safety issues on the Reserve. This importantly provides an accurate analysis of the obligation on industry to protect the shack owners, and that the Reserve can feasibly remain into the future given its location and the nature of the nearby Alcoa alumina refinery. Various legislation applies to secure this. A copy of the letter is provided as Attachment 4. The letter quotes as follows:

"In relation to the public risk from industrial facilities, the existing land use of Reserve 24308 is primarily protected under the Dangerous Goods Safety Act 2004 either via the Dangerous Goods Safety (Storage and Handing of Non-Explosives) Regulations 2007, or where a major hazard facility is concerned, via the Dangerous Goods Safety (Major Hazard Facilities) Regulations 2007. Specifically, any industrial facility near the Reserve that is regulated under either of these regulations is obliged to minimise the risk to people, property and the environment to a level as low as is reasonably practicable."

"The Kwinana Alumina Refinery is a dangerous goods site regulated under the Dangerous Goods (Storage and Handling of Non-Explosives) Regulations 2007. The refinery is not a major safety hazard facility and its operations do not pose a credible risk to occupants, other users or property at Reserve 24308. As such the refinery does not, and will not adversely influence the continuation of either the current or any other compatible land use at the Reserve.

3.5 Kwinana Quay Project – Fremantle Ports Outer Harbour Project Recommendation Report on Preferred Option – October 2006

State planning and related reports have progressively been examining options, and refining plans since the 1940s for an expanded overflow port facility. Early planning work sought to strategically identify a broad port expansion site. At the strategic level, the State Government has provided ongoing support for the planning and development of an expanded port facility in the metropolitan area.

The ongoing support is underpinned by data that shows Western Australia has developed an increased reliance on sea trade; with projections outlining the Inner Harbour at Fremantle Port will reach capacity by the end of the current decade. This projection is supported by the fact that the Inner Harbour at Fremantle is WA's only dedicated container port. Almost all the States container trade is shipped through the Inner Harbour.

The Outer Harbour, known as the Kwinana Quay Project, has been through a myriad of background planning documents to aid in the refinement of the most appropriate infrastructure development option. Four development options underwent a Strategic Assessment process and were evaluated in a report dated December 2004 titled *Recommendation Report on Preferred Option.* 

Feedback from Westport in March 2022 advised that current investigations were focused on the area of Cockburn between the Alcoa Jetty and Kwinana Bulk Terminal. This supports that as it is unlikely the proposed Kwinana Quay project would pose an immediate risk to the continued use of Reserve 24308.

3.6 City of Cockburn Local Government Inventory and Heritage Listing – Naval Base Caravan Park – Reserve 24308

The City of Cockburn can identify areas within its boundary as needing 'special planning controls' to conserve and enhance the cultural heritage and character of an area. This was undertaken in respect of Naval Base Holiday Park, following a concreted push from lessees and the public to ensure the heritage value of the place would be protected. The Heritage Act is accompanied by a Policy which provides guidance for those looking to develop their shack or any other structure on the Heritage Area. This policy seeks to ensure development protects and enhances the collective value which represents the Naval Base Heritage Area.

The Naval Base Heritage Area has a continuous history as a holiday destination since 1933 and has been used by generations of families from Cockburn and the wider area. It is significant as a good example of the holiday camps that used to exist along the Western Australian coastline but have disappeared in the face of

development. Although individual shacks have changed since 1933, as a holiday destination the overall site has a high level of integrity and authenticity.

The Heritage Area Policy has the following requirements for Shacks undergoing development:

- 1. Any extensions or modifications to existing shacks need to meet the requirements of the Building Code of Australia;
- 2. Shacks should be of a small, modest scale with regard to their height and the size of the building footprint;
- 3. Shacks should be constructed of lightweight materials that are indicative of the informal 'holiday shack' character; and
- 4. Development of new shacks needs to be consistent with the overall site plan and be contained within the boundaries of their designated site area.

# 3.7 City of Cockburn Town Planning Scheme and Metropolitan Regional Scheme

Clause 3.2 of the City's Town Planning Scheme refers -

# 3.2 Regional Reserves

3.21 The land shown as "Regional Reserves" on the Scheme Map are lands reserved under the Metropolitan Regional Scheme and are shown on the Scheme Map in order to comply with the Metropolitan Region Town Planning Scheme Act.

3.2.2 Regional Reserves are not reserved by this Scheme.

3.2.3 The approval of the local government under the Scheme is not required for the commencement or carrying out of any use or development on a Regional Reserve.

Reserve 24308 is classified as a 'Regional Reserve' under the Metropolitan Regional Scheme (MRS). Any development or use requires the completion of an MRS Form 1A and its submission to the Western Australian Planning Commission (WAPC) for consideration and approval. The Form 1A is required to be signed by the relevant Regional Manager of the Department of Lands, on behalf of the State of WA as the owner of the land.

# 3.8 Perth Coastal Planning Strategy

The continued use and management of the Reserve is consistent with the Perth Coastal Planning Strategy, by way of the application of the A Class Reservation of the land and its associated Management Order which provides for recreation and camping.

# 3.9 Geotechnical Investigation - Background and History

The City commissioned Golder Associates Pty Ltd in September 1990 to undertake a geotechnical investigation of the erosion occurring to the limestone cliff face along the Naval Base Holiday Park foreshore. The Report, dated 8 October 1990, highlighted that there was a serious unknown level of risk to the public as a result of "…the collapse of a section of undercut cavity or the closing of such a cavity due to block rotation. Such collapse or rotation may occur without warning or prior dislodgement…"

On 6 November 1990 the City resolved to engage a blasting contractor to remove the overhanging rock formation at the front of Units 520 &521. The owners of these units were advised that they would have to relocate them. The City commissioned Golder Associates again in December 1990 to design the remedial blasting measures to stabilise the cliff face. The report on the design of the blasting and remedial measures was presented on 2 January 1991. The City encountered a series of issues concerning the future use of the Reserve, which delayed blasting works for several years. On 15 October 1997 the City authorised emergency expenditure of up to \$140,000, under section 6.8(1)(c) of the Local Government Act 1995, to complete remedial works to the Reserve.

In June 2009, consultant ATC Williams investigated subsurface conditions and stability as well as potential cliff hazards. They found that two shacks (514 & 515) required relocation or cliff stabilisation works. ATC Williams' findings were:

"Beach Cliff Survey – in the areas with beach level access, undercutting of the limestone was observed. In the areas with intact limestone slopes, the undercutting was generally about 1m high, with depths of 0.5m to 2m. The rock masses in these areas was competent however, a large scale rock failure is not considered likely. As noted in the Golder report, there are numerous limestone blocks lining the shore that have detached from the cliffs in the past. None appear to be from reent events, and no sign of incipient slope failure were observed. Since issuance of the Golder report in 1997, fences have been placed along the crest of the beach slope, and ground cover vegetation has established along the beachfront slope crest. In several locations, gullying and/or open cracks along the cliff face were noted, in once case partially masked by vegetation. Several cabins were within 1m to 2m of the beachfront cliff in the south-central portion of beachfront. As noted in the Golder report, beachfront cliff stabilization measures such as rock fill buttressing may be required in the future at these points.

Several shacks were noted to have roof downspouts discharging toward the crest of the beachfront cliff, with the potential for causing erosion and instability.

Site Survey – Generally the site was level, rising from beachfront to Cockburn Road to the east. Some hummocky ground was noted in the central part of the site, conforming to the underlying rock surface. No visible signs of ground subsidence, tension cracks or fissures were observed in the caravan park. Hand augured boreholes were advanced in 10 locations across the site. The boreholes revealed a thin layer of natural and/or fill sand overlying limestone. Generally the depth to limestone was in the range of 0.2m to 0.5m, increasing to over 1m in the vicinity of Cockburn Road, although several surface outcrops of rock were observed along the eastern boundary of the site.

Ground Penetrating Radar Survey – GPR surveys were conducted along 3 north-south profiles (parallel to shore) and 4 east-west profiles. GPR confirmed that the site was largely comprised of a thin layer of soil over rock. GPR showed the hummocky, fissured nature of the underlying limestone surface. Hand augers at several locations where GPR indicated fissures revealed sand infill into the fissures, and no voids or related ground subsidence were observed."

In December 2009 a major void developed between Shacks 540 & 541. These shacks are situated adjacent the cliff face and investigations revealed that likely the cause of the void was stormwater leakage from a poorly constructed drainage pipe leaching sand through the cliff face. The void was filled and the pipe repaired, however the incident demonstrated that the area is susceptible to the formation of voids that are not necessarily visible from the surface, nor necessarily identified from a typical grid pattern GPR or borehole survey.

A further inspection occurred in December 2017, and found that the area showed no signs of ground subsidence, fissures, tension cracks or building distress, however there were several home made beach access points.

In 2021 a void was located, and this was rectified by contractors.

Updated Coastal erosion studies will occur along the Cockburn coastline over then next two years (2023/24 and 2024/25). These studies will determine any area of concern or future investigation required along the coastline of Reserve 24308 and indicate any requirements, monitoring, actions or retreat planning.

## Actions Pertaining to Geotechnical Investigations

Regular geotechnical investigations of the site are required, most particularly to investigate the cliff face stability and for the possible presence of voids within the strip up to 50 meters wide from the cliff face. The results of the investigations will determine specific treatments found to be required and these will be planned, budgeted for, and undertaken as needed.

Separately, consideration needs to be given to a planned retreat from the cliff face of susceptible shacks, via the cessation of the leases near the cliff face. It is a key recommendation of this Management Plan that a separate staging plan be developed in consultation with the affected shack lessees to identify a timeline whereby shacks will need to have been removed to a new location on the site.

#### 4.0 Administration

4.1 Inspections

Annual inspections of each shack will be carried out by City Officers. The purpose of the inspection is to ensure that shacks are being kept in acceptable condition and that unauthorised extensions or modifications have not been carried out.

## 4.2 Soak wells

Small circular concrete soakwells 600mm diameter with concrete lids may be installed to capture wastewater from sinks. Soakwells must be installed within the lease holder's lease area and must be protected from cars or trucks by the use of bollards.

# 4.3 Making an Application for Planning Approval for Naval Base Shacks

## **Introduction**

In accordance with MRS requirements, Reserve 24308 is a regional reservation for 'Parks and Recreation'. Upon submission to the City of Cockburn, all applications for the development of land on Reserve 24308 are required to be referred to the WAPC for determination per clause 29(1)(a)(i) of the MRS and the Notice of Delegation under the Planning and Development Act 2005.

In almost every circumstance, all proposed development will require planning approval. This is a separate process to the building permit.

## Submitting the Application

Lessees need to submit the completed application to the City's Statutory Planning Division. Upon receiving the application, the Statutory Planning Division will forward it to the WAPC within 7 days. The City will then assess the application and provide a follow up recommendation to the WAPC within 42 days of the original referral taking place, as per clause 29(3) of the MRS.

## How will the Application be Assessed

The City's assessment and recommendation will be based upon the associated Local Planning Policy APD65 (Naval Base Holiday Park Heritage Area), the requirements of the lease and the requirements of the MRS.

## What must be Submitted

Application for planning approval must include:

- i. Completed MRS Form 1
- ii. Planning fee applicable (see Schedule of Fees)
- iii. Three scaled (1:100 or 1:200) and accurate metric site plans which show the following:
  - a. The entire lease site and all buildings (existing and proposed), dimensions, areas and including a north point
  - b. Relationship to all surrounding lease sites and all other infrastructure or services nearby (particularly fire infrastructure)
  - c. The location of different use areas within the existing and proposed building
  - d. Landscape areas (grass only) shown within the lease site
  - e. Parking areas shown within the lease site
  - f. Elevations and cross-sections (where applicable)
  - g. The location of the water tap and soak well

## 4.4 Making an Application for Building Permit – Reserve 24308 (Naval Base Shacks)

## Reserve Design Guidelines

Prior to submitting a certified building permit application (BA1 Form) to the City's Building Services, planning approval must have been received or the structure and associated works.

The below guideline provides information for size and design of any proposed structure.

A holiday accommodation (shack) may be constructed on each lease site area. The accommodation may be an enclosed building and shall have an overall floor dimension of no greater than 5.2m x 5.2m; and a maximum height of no greater than 2.7m (wall) and 3m (ridge).

Patio/pergola – a patio or pergola may be constructed on the east or west side of the shack. The patio or pergola shall be attached to the shack and be no greater than 1.8m wide. The patio or pergola must be open on three sides and not be longer than the shack that it is attached to.

No building structure will be permitted to be located closer than 1.8m to another building/structure on an adjacent site area, regardless of the maximum dimensions prescribed for a shack or patio or pergola.

Planning approval and a building permit must be obtained before any development commences.

#### Process to obtain a Building Permit

The process below applies in respect of a Building Permit:

- 1. The completed Certified Building Permit Application Form is required to be executed by the Minister for Lands and Regional Development as the owner of the land. The City's Property Services Team will arrange for this when the application is submitted to the City
- 2. An applicant must have a valid Planning/Development Approval for the proposed works.
- 3. An application must obtain a Certificate of Design Compliance from a registered independent building surveyor. The Certificate of Design Compliance confirms that if the building or works are carried out in accordance with the certified plans, the building works will be compliant with each building standard that applies to the building.

An applicant will need to have a registered consultant building surveyor carry out this process. This service is at commercial rates as negotiated with an independent building surveyor. The City of Cockburn cannot offer this service. A list of registered consultant building surveyors is available from the Building Commission website – www.buildingcommission.wa.gov.au

#### **General Building Information**

Site Overview: The City of Cockburn is of the opinion that the shacks are best compared to a Class 3 building for the purposes of the Building Code of Australia Volume 1 (BCA – Part A3). The applicable building standards are as defined in Specification A1.3 of BCA Volume 1. It is noted that the City's Health, Engineering and Planning requirements must all be met prior to the issuance of a building permit.

## Litter Control

It is the Authorised Persons (i.e. the builder or licensed contractor undertaking the building or demolition works) responsibility to take all appropriate measures to prevent litter escaping from the site for the duration of any building or demolition works. Burning of waste material and litter on site is not permitted.

#### Dust Control

It is the Authorised Persons responsibility to minimise windblown dust nuisance by suitable means during any building or demolition works.

#### Noise Control

All construction activities/works must be carried out between the hours of 7am and 7pm Monday to Saturday. No construction works are to be carried our on Sundays or public holidays.

#### <u>Asbestos</u>

If asbestos is being removed it is to be disposed of in accordance with the Health Asbestos Regulations 1992 and the Environmental Protection (Controlled Waste) Regulations 2001

#### Maintenance

All works subject to an approval by the City are to be maintained in a satisfactory state of repair. Dilapidated building/structures may at the discretion of the City be required to be removed.

#### **Nuisance**

If any works approved by the City are found to be a nuisance to other Lessees for reasons that are determined to be valid by the City, the works may at the discretion of the City be required to be removed.

4.5 Making an Application for a Demolition Permit – Reserve 24308 (Naval Base Shacks)

## **Development Approval**

Prior to submitting a demolition permit application, an applicant must have submitted a development application to the City's Statutory Planning Services for the demolition and obtained approval.

# Process to obtain a Demolition Permit

The Demolition Permit Application Form (BA6) is required to be executed by the Minister for Lands and Regional Development as the Owner of the land. The City's Property Services Team will arrange for this when the application is submitted to the City.

An applicant must have a valid Planning/Development Approval for the proposed demolition works. Please refer to the other guidelines explaining the process for obtaining planning/development approval.

## **Definitions**

**"Building"** means building works that are not exempt works under the Building Act 2012 and associated Regulations.

"**Development**" means the development or use of any land, including demolition, erection, construction, alternation of or addition to any building or structure on the land and carrying out on the land any excavation or other work and also includes any act or thing that –

- a. Is likely to change the character of that place or the external appearance of any building; or
- b. Would constitute an irreversible alteration to the fabric of any building.

## Other works

Other works may be defined as works that do not fall within the definition of building./development work. Such work generally will not require development approval or a building permit. However, the City's consent is required for other works, and a Form NBHA1 must be submitted to the Property Services Team together with a detailed scope of works/specifications for the proposed other works. Subject to the level of works the City's Property Services Team will advise if the lessee will be required to submit any further applications. Some examples of these other works include:

- a. recladding of exiting walls
- b. recladding of exiting roof
- c. replacing/repairing gutters and downpipes
- d. antenna (less than 1.8m above roofline if fixed to a roof)
- e. repainting

## 4.6 Lease

A report was taken to Council in June 2024 to

- endorse a lease term of five years with an option for a further five-year term at the absolute discretion of the City of Cockburn at the agreed lease fee of \$3250 per annum with CPI increases annually. The lease fee includes general maintenance to facility and grounds, capital improvements, cleaning, utilities, CCTV, rubbish collection charges, the emergency services levy and security services charges;
- 2. endorse a demolition levy of \$330 per annum increased annually by CPI.
- 3. Lessees will be responsible for Public Liability Insurance for a sum not less than \$20 million
- 4. Compliance with Local Laws
- 5. No approval of portable toilets
- 6. Water useage in line with the Water Services Act 2012 (WA)
- 7. A Persistent Breach clause
- 8. Endorse the preparation of a Management Plan for Reserve 24308, noting the demolition process per the lease agreement, with reference to terminated sites at the Naval Base Shacks.

The new lease will be finalised August 2024 and commence on 1 September 2024. Key details include:

# Lease Fee

The lease fee is an all-inclusive figure for leasing sites at the Naval Base site, which covers general maintenance to facility and grounds, capital improvements, cleaning, utilities, CCTV, waste removal and emergency services levy. The lease fee will be increased by CPI each year.

The funds raised by the lease fee are placed in the Naval Base Shacks Reserve fund. Any funds expended from this reserve are transferred in accordance with the Budget. All surplus funds are quarantined to be spent on upgrading the site.

## **Demolition Levy**

The introduction of the demolition levy in 2010/11 was to cover the City in the circumstances where a shack had to be removed and the leaseholder either did not want to pay or could not pay for its removal. The City has agreed to quarantine these funds so that in the eventuality the Shack is removed by the relevant leaseholder and at their cost, the leaseholder would receive the funds back. This was implemented so that the City would not have to resort to expensive civil litigation to recover any outstanding debt. The collection of the demolition levy under the new lease commencing 2024 ensures the levy's held in reserve covers demolition costs in line with inflation.

#### Insurance

The City currently has Public Liability Insurance for areas surrounding the Shacks however this will not cover any incident which occurs within or as a result of a Shack. It is not the City's responsibility to take out insurance for privately leased sites. Each Lessee is to take out and maintain cover for Public Liability insurance.

#### Local Laws

The lessee must comply with all local laws on the lease area or common areas.

## Portable Toilets

No portable toilets will be approved on the leased area and all portable toilets located on the lease area must be removed.

## **Sprinklers**

Sprinklers can only be used within the hours and days specified by the Water Corporation.

#### Hose Connections

The Lessee must repair any leaking hose fitting connections. The City has a right to repair and recover the cost if the lessee does not repair within 7 days of notice of repairs being required.

Hose connections must be a caravan connection. This means a removal hose that is above ground, and used to connect the shack to one of the communal external water connections.

#### Persistent Breach

Occurs when the lessee has received three or more default notices during the term of the lease. A persistent breach will result in the lease agreement being terminated.

#### Maintenance

The lessee agrees during the Term and for so long as the lessee remains in possession or occupation of the site to maintain, repair, replace, clean and keep the site (which for the avoidance of doubt includes any building constructed on the site) clean and in good repair.

The Lessee must comply with all reasonable conditions that may be imposed by the City from time to time in relation to the Lessee's maintenance of the site.

## Cleaning

The Lessee must at all times keep the site clean, tidy, unobstructed and free from rubbish.

# <u>Repair</u>

The Lessee must promptly repair at its own expense to the satisfaction of the City any damage to the site, including damage of a structural nature, regardless of how it is caused.

## Pest Control

The lessee must keep the site free of any vermin or any other recognised pests and the cost of extermination will be borne by the lessee.

## **Building Requirements**

The Lessee must not, without written consent from the City or from any other person from whom consent is required under the lease, and required under statute in force from time to time (including but not limited to the planning and building approval) erect or remove any buildings, structures, alterations, additions or improvements on the site or remove any flora or fauna, alter or cut down any flora or sell, remove or otherwise dispose of any flora, sand, gravel, timber or other materials from the site or the land.

## Smoke Detectors and Gas Certificates

The lessee must install a lithium-ion battery smoke detector, or any other approved detector as specified in the relevant legislation in each shack. The lessee must also provide to the City a gas safety certificate for any gas installation on the site.

# Short Term Accommodation Only

The City is not supportive of lessees using their shack for longer than 120 days in any year because of the close proximity of the shacks to Kwinana which is the State's major heavy industrial area. Many of these industries are located in Kwinana because they are potentially dangerous, and they could not be located anywhere else in/near Perth. The recommendation (by the EPA) buffer from residences to a typical heavy industry is 1-5km. This is to provide protection to the residents by ensuring that any emissions are able to be diluted in the atmosphere before they reach the residential areas. It is also to provide some protection to these major industries of state and sometimes national significance so that they are not required to invest significant funds in excessive emission control and operational safety systems. The City's requirement is that the Shack is to be used for 120 days in a year no matter who is staying in the shack. The City introduced an Occupancy Log which is to be maintained by each Lessee. The log is to be made available for inspection by the City's representative at any time.

## No Toilets or Showers - Kitchen Sinks Only

The Lessee is not allowed to install a toilet or shower, or plumbing which will permit the installation of a toilet or shower.

The Lessee may install a kitchen sink. A semi-permanent hose connected to the external water tap (similar to caravans) is acceptable with the outlet tap located over a kitchen sink. The sink will discharge via a trapped waste pipe to a soak well. The expectation is that when the site is not occupied the hose will be disconnected from the water supply.

The Lessee may install, with the City's prior written consent, a single 600mm soak well with a concrete lid upon the site. The soak well will be for kitchen grey water only. Any application must include an appropriate quality sketch depicting the proposed location of the soak well. It must be protected from vehicular traffic due to it's location, or the installation of bollards.

## No Generators

No generators are to be used on site at any time unless the City has provided prior written consent.

## Solar and Wind Power Sources

Solar and Wind Power sources maybe installed on the shacks with the consent of the City.

## No subletting

The Lessee must not sublet, licence or part with possession of the Site whether for profit or not.

#### No assignment or sub-letting without consent

The Lessee must not assign or sell the leasehold estate in the site or dispose of the site or any part of the site without the prior written consent of the City and the Minister for Land's consent which may be withheld in their absolute discretion.

## **Option to Renew**

Whilst a five year option period has been included in the lease, it is at the Council's absolute discretion. Minister for Lands may terminate upon notice. The Minister for Lands may terminate their Lease for any reason upon six months written notice to the Lessee and City.

No compensation or other consideration shall be payable to or claimable by the Lessee rom the City for or arising out of the termination of this Lease by the Minister for Lands.

# 4.7 Administration of the Site

## **General Complaints**

Facilities not being maintained – Property Services Team via email <u>shacks@cockburn.wa.gov.au</u> or 9411 3444

Items being stored at the Reserve when a Lessee is not in attendance - Property Services Team

The City's CoSafe will patrol the park on a regular basis. They can be contacted during work hours on 9411 3444 or after hours on 1300 267 233.

## Noise Complaints

Noisy or anti-social behaviour can be reported to CoSafe, however CoSafe is not able to take any action, they are only able to attend. Therefore, it is preferred if the Police are contacted in the first instance on 131 444 or in an emergency 000.

Due to the close proximity of the shacks, noise level restrictions will be applied as per the Environmental Protection (Noise) Regulations 2997.

The NBHA will provide lessees with a copy of some neighbourly rules which apply to the park.

## Rubbish Collection

The number of bins and waste collection days will be increased on some long weekends, Easter and Christmas due to the increase in the number of Lessees at the site.

## Dumping Whitegoods and other rubbish

If a witness is available the parties in question are to contact the Ranger Services on 9411 3444. The witness must be prepared to provide a statement and go to court if required.

The Rangers can instruct the offending parties to remove the items in question, and if they fail to do so, they can be prosecuted under the Litter Act provisions basing this on the statement provided by the witness at the time.

## **Cleaning of Facilities**

The cleaning of both ablution blocks has been increased over the Easter and Christmas periods.

## Maintenance

Maintenance requests and reports can be made by emailing <u>shacks@navalbaseshacks.com</u> or calling 9411 3444.

Signs with QR codes have been installed at the ablution blocks at Naval Base Shacks to allow requests for maintenance to be streamlined and made by mobile. <u>Phone Calls</u>

The Property Services team can be contacted if a Lessee wishes to contact another Lessee. Phone numbers and addresses will not be provided by the City can act as a conduit to facilitate the contact if it is deemed a

reasonable request. Contact with Property Services can be made by via email (<u>shacks@navalbaseshacks.com</u>)

Lessees can contact a member of the Naval Base Holiday Association in person or via email (<u>committee@navalbaseshacks.com</u>)

## **Dispute Resolution**

Disputes are generally better to be resolved by the Lessees themselves. If required, the police can be contacted on 131 444 or in an emergency 000.

# <u>Dogs</u>

The Lessee must comply with the Dog Act 1976. All dogs must be always kept on a leash. There is a maximum of two dogs per shack. The owner of any dog is required to remove dog faeces and dispose of them in a suitable, sanitary manner. Any complaints are to be reported to the City of Cockburn Rangers who are contactable on 9411 3444 or in an emergency after hours on 1300 658 877.

# Campers/Caravans/Boats/Trucks

Campers/tents or caravans will not be permitted on Reserve 24308. Boats and tents can be stored within a Lease area only while the Lessee is staying at the Shack. Under no circumstances are they to be stored on the Reserve. Please contact the Property Service Team at <a href="mailto:shacks@cockburn.wa.gov.au">shacks@cockburn.wa.gov.au</a> if there are any queries regarding this.

Reports of squatters/campers/caravans can be made direct to the City's Rangers on 9411 3444 or in an emergency after hours 1300 658 877.

# **Collecting Keys**

Swipe cards to the ablution blocks can be purchased from the City of Cockburn main office between the hours of 8.30am and 4.30pm. A log of lessees purchasing swipe cards will be maintained by the City of Cockburn.

## Holding Events

Any event is to be a closed event to Lessees only.

Events are required to deal with a variety of risk management issues, and accordingly sufficient time must be left to ensure all approvals are obtained prior to an event taking place.

The following matters are required to be finalised before the event and the NBHA advised of the outcome:

- Parking and traffic management arrangements;
- Permission is to be granted via all neighbouring Lessees and the NBHA;
- Letterbox drop to be completed by the Lessee's intending to hold the event informing all other Lessees of the commencement time, number of people and finishing time;
- Extra bins are to be provided and rubbish removed from the site;

Any event shall have a maximum attendance of 20 people (including the lessees). For events exceeding the limit of 20 people both NBHA and the City must approve.

Due to the close proximity of the shacks, noise level restrictions will be applied as per the Environmental Protection (Noise) Regulations 1997.

The organiser of the event will be required to clean up after the event.

## Community Infrastructure

Community infrastructure on the site includes two ablution buildings, roads, drainage, water and electrical infrastructure, lighting, beach access steps, signage, rubbish bins, common grassed areas and CCTV cameras. The City manages the Community Infrastructure including provision, operating, maintenance and disposal.

The City's facilities team consists of coordinators and trade related staff along with relevant contractors that manage and maintain the City's buildings and facilities and other infrastructure. Works are undertaken based on a planned capital works and maintenance program and regular servicing (e.g. cleaning). In addition, inspection and treatments are undertaken in response to Customer Requests from and through the City's Property Services Team. Staff and contractors are on call to respond should urgent works be required.

Requests for new infrastructure or requests or complaints concerning existing infrastructure should be directed to the City's Property Services Team at <a href="mailto:shacks@cockburn.wa.gov.au">shacks@cockburn.wa.gov.au</a>

## Dune Management

The City does not undertaken any dune maintenance activities in this area as the shoreline is quite rocks and dunes are not prevalent. The Perth Regional NRM Coastcare Facilitator undertakes some revegetation in conjunction with community members.

## Fence Maintenance

The City carries out regular inspections of the site boundary fences and maintains and where necessary will replace fence sections as required.

# Lease Assignment Process

- a. The Lessee is permitted to advertise the sale/assignment of their lease privately
- b. Potential purchasers can contact the Property Services Team to obtain information in relation to the Reserve.
- c. The current Lessee is to request the assignment paperwork it will not be sent to a potential purchaser. This will include a Lease Application Form for the potential purchase to fill out and submit to the City for approval.
- d. A Lease transfer **WILL NOT** proceed if the potential purchaser is not approved by the City.
- e. The City is not a party to the negotiations or sale process;
- f. The parties are to complete the request for assignment paperwork and forward the originals to the City.
- g. The request for assignment will not progress until all outstanding monies to the City have been paid in full.
- h. Following confirmation of no outstanding monies, the City will forward the document to the Minister for Lands for consent and execution (this process can take up to 2 months to complete).
- i. An assignment of lease document will then be forwarded to both parties for their execution, this will include a copy of the original lease document. The City will request a copy of the insurance certificate to be provided by the new lessee at the same time. The City will not consent to the assignment of the lease until a copy of the insurance has been provided.
- j. The City will execute the assignment of lease document once the insurance has been provided and then forward the lease to the Minister for Lands for execution.
- k. Once fully executed, a copy of the document is to be forwarded to the new lessee for their records.
- I. All parties will then be advised that the transfer has been completed.

NOTE: City Officers are not able to provide legal or any other advice to either the Lessee or potential purchaser regarding the sales part of this process. City Officers will not act as a mediator if there is any dispute relating to the sales process. The negotiations and transfer of any funds is solely the responsibility of the Lessee and potential purchaser.

## **Emergency Management Procedures**

In an emergency telephone:

Fire Brigade, Police and Ambulance: 000 When the emergency number is dialled: Advise your location; provide your name and telephone number and any other information requested by operator.

In a Non-Emergency telephone:

- Fire Brigade 1300 657 209
- Police 131 444
- Ambulance 131 233

City of Cockburn Contact Numbers:

- Business hours 9411 3444
- Rangers 9411 3444
- Co-Safe 1300 267 233

Emergency After Hours Assistance 1300 658 877

## Site Maps

Individual Site Maps have been completed for all sites and included in each Lease document. If any amendments to lease site areas are required, the Property Services Team will facilitate this by contacting the relevant lease holders. All the abutting lease holders must agree to the amendments. Each lease holder has the right of refusal to any requests, and this will be the binding determination.

For the purposes of constructing new shacks the boundaries of the lease areas may be required to be pegged by a Licenced Surveyor, this will be at the cost of the Lessee. The City is able to provide the necessary information to the Surveyor for the purposes of pegging the boundaries.

# 5.0 Detailed Planning for Infrastructure Upgrades

## <u>General</u>

The City develops and maintains Long Term Financial Plans, 10-year Capital Works Programs and annual (financial year) capital and operational works programs and budgets, drawing on Asset Management Plans and the Community Strategic Planning process. Major Capital works are incorporated into the 10 year forward plans whilst minor works are identified and provided for in the annual budgeting process. In the case of the Naval Base Shacks, any determined Asset Management Plans or Capital Works are financed by the Naval Base Shack Reserve within the City's financial plan. Any capital works proposed for Naval Base Shacks will be communicated and consulted with the Naval Base Shack lessees prior to any Reserve budget being adopted for this purpose.

#### Annual Operational Budget

The following budget is for the operational costs for the Naval Base Shacks in line with site service and current market contractor costs. This budget does not include proposed capital works. The budget will be adjusted by CPI annually, and market rate where variable increases occur, for the term of the lease.

The budget is indicative to the level of service provided to Reserve 24308. All endeavours are made to minimise the budget spend each year with any surplus to be returned to the Naval Base Shacks.

Service	Budget
Naval Base Shacks Officer (contract)	\$127,000
Coastline/Cliff face management	\$25,000
Scheduled and Reactive Maintenance	\$136,000
Security and CCTV	\$15,000
Waste Management	\$25,000
Compliance audits and actions	\$15,000
Parks and Street Furniture	\$10,000
Utilities	\$57,000

Administration	\$5,000
TOTAL	\$415,000

Operational costs including for rubbish removal, cleaning of the facilities and utility costs are covered in the annual (FY) operating cost budget provisions as detailed above. Specific investment areas are detailed below. Roads

The City will continue to review and maintain the condition of all roads within the site to meet with suitable road standards and will look to resurface the roadways within the site when the surfacing condition requires it.

#### <u>Drainage</u>

The City identified that there were several drainage issues associated with the site. Suitable treatments were investigated and implemented, with the highest priority being where the runoff from common property is impinging on lessee buildings or pedestrian access paths. This will continue to be monitored for any repeat events.

#### Sewerage

The site has common use ablution buildings which are currently served by septic systems and leach drains. These require periodic emptying. Due to the Archaeological Heritage constraints to the site, connecting the site to the Water Corporation's sewerage system at Henderson is not possible. The septic system will continue to be monitored and serviced as necessary.

#### **Beach Access**

The beach access points including stairway access, handrail suitability and disability access will be reviewed periodically with a view of progressively improving and maintaining the general accessibility for all beach users.

#### **Coastal Engineering**

The Reserve will continue to be monitored for any shifting or increased risk associated with coastal inundation and erosion.

## Pontoon

The City will investigate the provision of a Pontoon to be installed.

## Laundry

The City will demolish the Laundry building as it is no longer fit for use. The City will investigate the options of a communal space with shade and furniture.

#### Tap Replacement

The City will inspect and test all taps within the site and any taps found to be substandard will be replaced.

#### Ablution Buildings

The City will investigate, plan and develop new toilet/shower facilities.

## Playground

The City will investigate, plan and develop of a playground.

#### Vacant sites

Subject to the outcome of geographical studies to the cliff face on the Reserve to determine if a retreat plan is required for the Naval Base Shacks, the City will, in conjunction with the Shack Lessees and independent planner, determine the best use of vacant sites. This may include options of communal spaces, remaining vacant or re-lease options.

#### Strategic Site Plan

In order to ensure that the best use of the site holistically, the City will investigate engaging a planning consultant with the view of seeking well thought out and informed options for the best use of any additional spaces that are vacated following the 2023 lease compliance audit.

	FORM LAA-1023		DUI	PLICATI	\$	SECTION
RESERVE DESCRIPTION (NOTE 1)       EXTENT       VOLUME       FI         24308       Whole       3107       Image: State of the s

#### Attachment 4 – Letter from Department of Mines

10/11958 Government of Western Australia Department of Mines and Petroleum **Resources Safety** CITY OF COCKBURN RECEIVED 1914 Your ref: Our ref: RSD0494/2007/3 30 APR 2010 Philip Hine - Ph 93588161 Fax 93588188 Enquiries: Email: philip.hine@dmp.wa.gov.au FILE No.341204 COPY Mr Andrew Trosic COR FILE HECASE Manager Strategic Planning City of Cockburn PO Box 1215 BIBRA LAKE DC WA 6965 Dear Andrew ADVICE REGARDING RESERVE 24308 AND POTENTIAL INDUSTRIAL RISK ISSUES Thank you for your letter of 28 April 2020 regarding the above. As requested I provide the following responses to your questions: 1. In relation to public risk from industrial facilities, the existing land use of Reserve 24308 is primarily protected under the Dangerous Goods Safety Act 2004 either via the Dangerous Goods Safety (Storage and Handling of Non-Explosives) Regulations 2007, or where a major hazard facility is concerned, via the Dangerous Goods Safety (Major Hazard Facilities) Regulations 2007. Specifically, any industrial facility near the Reserve that is regulated under either of these regulations is obliged to minimise the risk to people, property and the environment to a level as low as is reasonable practicable. Additional protection may be provided via Ministerial conditions imposed by the Minister for the Environment, or via environmental licence conditions imposed by the Department of Environment and Conservation, both under the Environmental Protection Act 1996. 2. The Kwinana Alumina Refinery is a dangerous goods site regulated under the Dangerous Goods Safety (Storage and Handling of Non-Explosives) Regulations 2007. The refinery is not a major hazard facility and its operations do not pose a credible risk to occupants, other users or property at Reserve 24308. As such, the refinery does not, and will not adversely influence the continuation of either the current or any other compatible land use at the Reserve. Level 1, 303 Sevenoaks Street (cnr Grose Ave) Cannington WA 6107 Postal address: Mineral House, 100 Plain Street, East Perth WA 6004 Telephone: (06) 9358 8002 Facsimile: (06) 9358 8000 ResourcesSafety@dmp.wa.gov.au www.dmp.wa.gov.au W8.00V.8U

Should you have any further questions in relation to this matter please do not hesitate to call.

Yours sincerely

PS.12 -

Philip Hine Director DANGEROUS GOODS SAFETY BRANCH
