

Cat Vaccinations Video Transcript

This is Steve

Steve is Due for his final kitten vaccinations down at Spearwood Vets

He is also being microchipped, sterilised and registered with the City

Vaccines are a vital part of preventative health care

and will protect them from harmful bacteria

Cats need vaccinating at 6 to 8, 12 and 16 weeks and then annually

Make sure you keep up to date with flea and heartworm treatment

Happy and healthy back at home

He's lapping the love and exploring his backyard safely.
