

Noise from Residential Equipment

CITY OF COCKBURN
HEALTH SERVICES

Under WA noise legislation, “**Specified equipment**” is defined as any equipment that requires the constant presence of an operator for normal use. *Examples of specified equipment include many household items such as lawnmowers and power tools.*

This guide outlines measures within Regulation 14 of the *Environmental Protection (Noise) Regulations 1997* to control noise from tools and equipment used in the residential homes.

This regulation imposes certain requirements on the use of “specified equipment” such as lawn mowers or musical instruments in a residential setting. If the following conditions are not met, noise emissions must comply with ordinary Assigned levels under the Regulations.

Specified equipment must be used according to the following conditions:

1. The equipment is only to be used between the hours of:

<u>Start</u>	<u>Finish</u>
7:00am	7:00pm - Monday-Saturday
9:00am	7:00pm— Sundays/Public Holidays

2. The equipment must not be used

- For more than **TWO** hours on any one day; OR
- For a musical instrument, for more than **ONE** hour on any one day

3. The equipment must be **used in a reasonable manner**;

4. The use of the equipment **must not interfere with the health and amenity of surrounding neighbours.**

Under the *Environmental Protection Act 1986* (WA), a person who emits or causes or allows noise to be emitted, which unreasonably interferes with the health, welfare, convenience, comfort or amenity of any person, commits an offence.

The City of Cockburn’s Environmental Health Officers, in assessing what constitutes unreasonable noise consider:

- The magnitude of the noise emission (How loud it is);
- The duration of the noise emission (How long it goes for);
- How often the noise emissions of that type occur; and
- The purpose for which the equipment is used.

For further information contact the City’s Health Service on 9411 3589.
