

## **Support funding for more sport and recreation facilities in Cockburn – Video Transcript**

### **Fremantle Dockers Player - Cam McCarthy**

I have been playing with the Fremantle Dockers for three years now. I think my favourite part of training here is the area I grew up in.

I spent almost all my life here so it's great to be able to just drive, drive down the road, I live in Spearwood now so I'm still pretty close to mum and dad and the Cockburn community.

The facilities are really important to get people down to clubs and having good facilities obviously helps the club and puts it in a stronger position, so better the facilities are I guess more people you get down there.

We have everything you need, recovery pools, better running track inside, the gym's world-class, it's a really nice fit for our footy club and hopefully it will go a long way in the future.

Being a professional athlete in the area I grew up in, and feel comfortable in, yeah it's huge. And just having a professional club like ourselves the Fremantle Dockers here where kids can just come, shoot some hoops and come down and watch us train on a daily basis would be massive for their spirits.

Cockburn's such a big community it's good to have such a professional sporting club and a facility where the community can come and use as well, that would be massive for not only us but the community as well so we can interact, that's why it's so important for the government to fund these sporting clubs.
